

From **Phonics** to **Reading**

Boost Fluency with Meaningful Application of Targeted Skills!

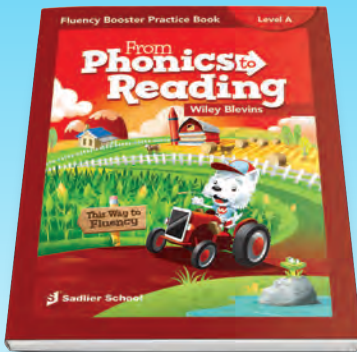

Fluency Booster Practice Book Grades K–3

Wiley Blevins, author and early literacy expert, takes a fresh approach to the Science of Reading with the *Fluency Booster Practice Book* that builds fluency with engaging decodable texts and effective practice activities.

Boost Fluency, Vocabulary, and Comprehension!

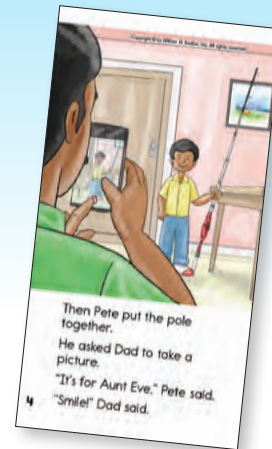

The **Fluency Booster Practice Book** builds fluency with engaging decodable texts and effective practice activities. Each grade-level book is organized by skill and aligned to the scope and sequence of Wiley Blevins's *From Phonics to Reading*™, but can be used as a stand-alone supplement for foundational skills practice.

The Online Annotated Teacher's Edition supports each activity with guidance for reading and rereading decodable texts, boosting vocabulary, and increasing comprehension for improving students' fluency.

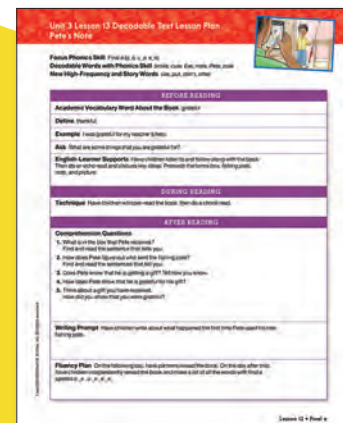

Decodable Texts

With 30 decodable texts for each level, develop strong early reading behaviors through repeated readings with activities for building vocabulary, increasing comprehension, and writing in response to text. The kindergarten level includes both pre-decodable and decodable texts.

Online Teacher Lesson Plans for Decodable Texts

Each Lesson Plan focuses on the targeted phonics skill, identifies related vocabulary, provides comprehension questions, and guides instruction and practice before, during, and after reading the decodable text. Writing prompts provide opportunities to respond to open-ended questions. The Fluency Plan includes partner readings and independent reading with target phonics skills.

The Vocabulary and Comprehension Activities

Build word knowledge and deepen text meaning with these activities related to the decodable texts.

Vocabulary activities include decodable, high-frequency, and story words. The comprehension questions are scaffolded, providing literal, critical thinking, and text-to-self connection questions.

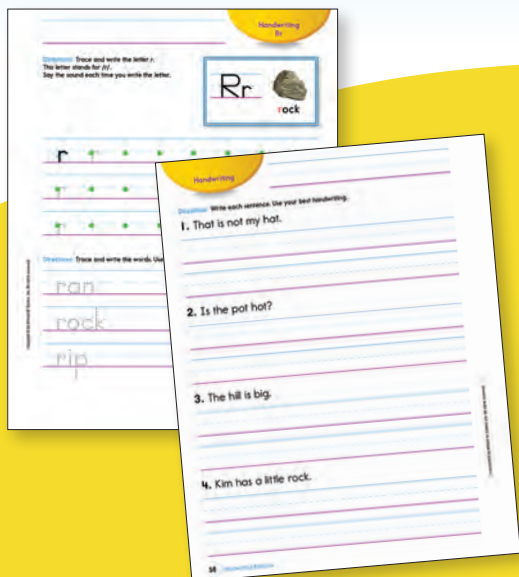

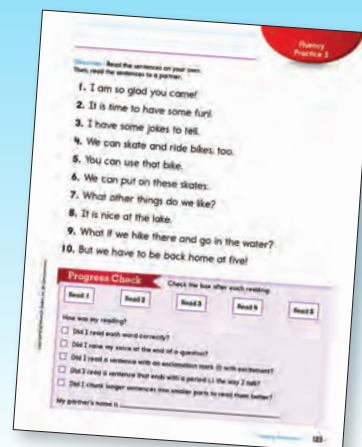

Writing Activities

Reinforce recently taught phonics skills and vocabulary with opportunities to write in response to the decodable texts.

Fluency Practice

Help accelerate students' phonics mastery and fluency development with repeated practice of cumulative unit-level skills. Fluency Practice activities include both independent and partner readings of sentences including words of previously taught phonics skills. Self-Progress Checks support students in monitoring their fluency progress.

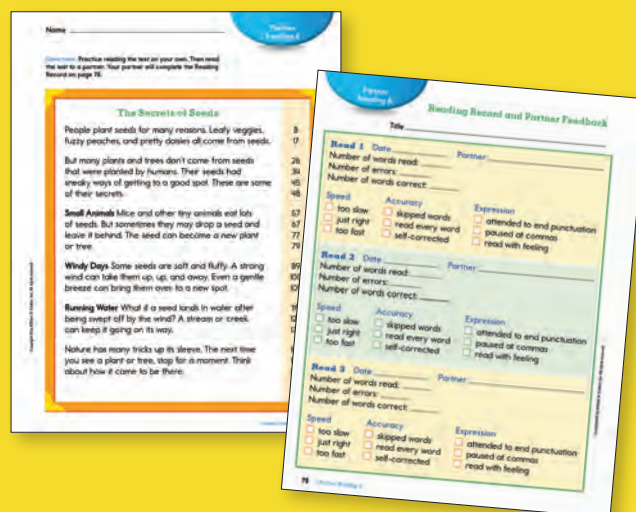

Handwriting Activities (Grade K only)

Foster letter-writing fluency and letter recognition automaticity with these activities to reinforce reading development. When students work on their handwriting and increase their letter knowledge, the regions of the brain associated with literacy, reading, language, and memory are activated.

Partner Reading (Grades 2 and 3 only)

Provide opportunities for students to not only practice their fluency but support each other in building comprehension. Students read these short texts multiple times, working on their accuracy, rate, and prosody. Reading Record and Partner Feedback forms help students work together as partners.
