

From Phonics to Reading™

Enhance Phonics Instruction with Engaging Independent Practice!

Interactive Practice Bundle
Grades K–3

**ENHANCED
WITH NEW
COMPONENTS!**

Wiley Blevins, author and early literacy expert, takes a fresh approach to the Science of Reading with the Interactive Practice Bundle that provides plenty of online resources to reinforce decoding, encoding, and reading comprehension skills.

Phonics Practice That Keeps Kids Coming Back for More!

As Wiley Blevins always says, “It’s in the application where the learning sticks.”

The **From Phonics to Reading™ Interactive Practice Bundle** provides plenty of online resources to help decoding, encoding, and reading comprehension skills “stick,” reinforcing teacher-led instruction.

Use these playful and stimulating resources in small groups or independently inside and outside the classroom!

Interactive Decodable Library

The **Decodable Library** includes 240 online decodable texts from across Grades K-3. Organized by skill, each decodable and pre-decodable text includes a Teacher Lesson Plan with supporting instruction for before, during, and after reading. Comprehension questions, a Writing Prompt and a Fluency Plan engage students throughout the learning.

NEW! Vocabulary Booster with Spanish Support

A new **Vocabulary Booster** component provides teachers with an effective routine to preteach unknown words in the Blend It lines and decodable texts to build students' vocabulary knowledge.

Vocabulary words are supported by images, teacher suggestions for acting out, and demonstrating or defining words. Spanish audio provides an opportunity to connect to students' home language through culturally and linguistically responsive content.

454 Interactive Games

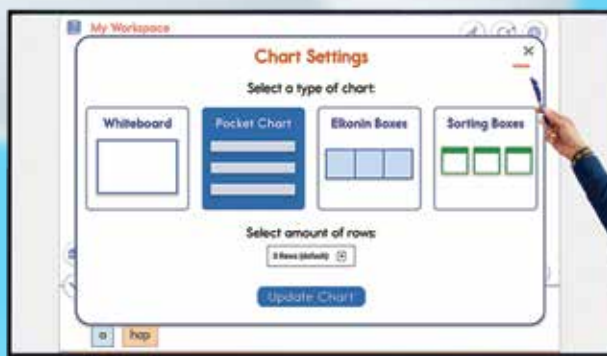

These assignable **interactive games** with corrective feedback bring playfulness to practice for blending, spelling, and reading comprehension routines.

With a variety of built-in support, students can independently practice skills in the classroom or at home. They start with the “How to” video for clear directions on the routine. As they practice, they’re given several tries with immediate feedback. Audio support is available.

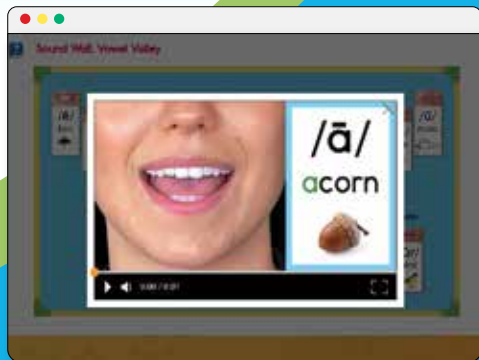

NEW! Interactive Pocket Chart

The **Interactive Pocket Chart**

actively engages students as they make connections between sounds, letters, words and images. Teachers select the appropriate workspace—Whiteboard, Pocket Chart, Elkonin (Sound) Boxes, or Sorting Boxes—to customize the content to suit specific needs of students and the lesson objectives. This flexibility allows for targeted instruction and differentiation. Lesson-specific cards preloaded in the Pocket Chart simplify lesson-prep and classroom instruction.

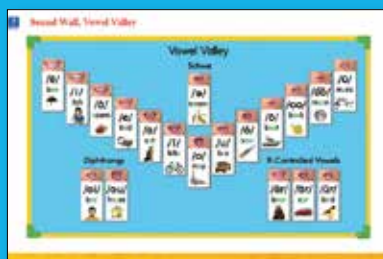

The **Card Library** contains letter cards, word cards, and image cards that are sortable. Teachers can create new word and letter cards and delete or edit existing cards.

44 Sound Wall Cards and Articulation Videos

Beginning with the **Sound Wall cards**, teachers introduce the phoneme skill. The **articulation videos** reinforce the pronunciation of the sounds and formation of the mouth. The interactive Vowel Valley, Consonants, and Grapheme Sound Walls can be used for the whole class, small groups, or individually to enhance instruction.

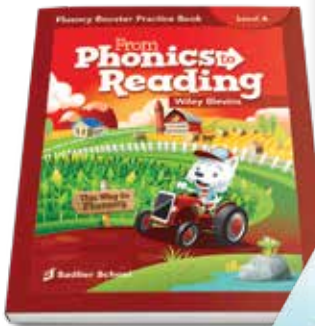

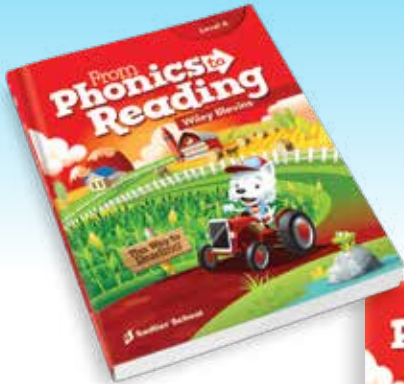

NEW! short vowels sound cards provide support with sounds in the initial and medial positions.
