

Enhance Phonics Instruction with Engaging Independent Practice!

Interactive Practice Bundle
Grades K–3

Wiley Blevins, author and early literacy expert, takes a fresh approach to the Science of Reading with the Interactive Practice Bundle that provides plenty of online resources to reinforce decoding, encoding, and reading comprehension skills.

Phonics Practice That Keeps Kids Coming Back for More!

As Wiley Blevins always says, “It’s in the application where the learning sticks.” The **From Phonics to Reading™ Interactive Practice Bundle** provides plenty of online resources to help decoding, encoding, and reading comprehension skills “stick,” reinforcing teacher-led instruction.

Use these playful and stimulating resources in small groups or independently inside and outside the classroom!

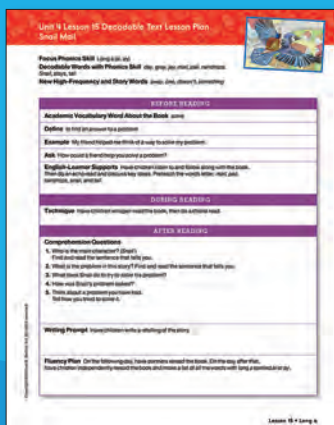

240 Decodable Texts

Organized by skill, each online decodable text includes a Teacher Lesson Plan, a recording of a fluent reader, and the ability to print. There are pre-decodable texts for the earliest readers who have not mastered enough phonics skills to fully decode a text.

Students listen to directions, interact with the text, and practice targeted phonics skills and high-frequency words.

Access to the Decodable Library includes all texts across Grades K–3.

240 Teacher Lesson Plans for Decodable Texts

Each Lesson Plan supports instruction before, during, and after reading decodable texts and includes:

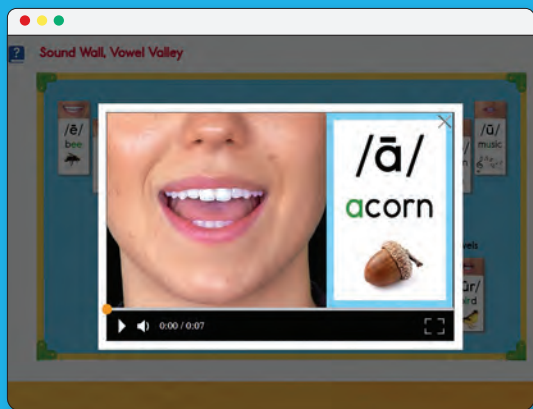

- Comprehension Questions that reflect a typical pattern for building vocabulary and comprehension with literal, critical thinking, and text-to-self questions
- A Writing Prompt that helps to deepen comprehension by asking students to write in response to the text
- A Fluency Plan that encourages students to reread texts, retell what they read to a partner, and write in response to the text

454 Interactive Games

These assignable interactive games with corrective feedback bring playfulness to practice for blending, spelling, and reading comprehension routines.

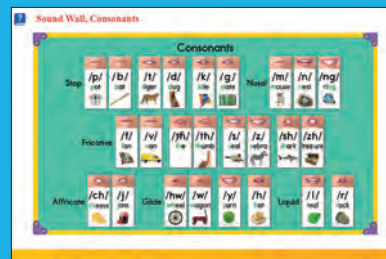

With a variety of built-in support, students can independently practice skills in the classroom or at home. They start with the “How to” video for clear directions on the routine. As they practice, they’re given several tries with immediate feedback. Audio support is available.

Games include Is It a Word?; Sort It; Built It; Sound It, Spell It; and Connect It.

44 Sound Wall Cards and Articulation Videos

Beginning with the Sound Wall cards, teachers introduce the phoneme skill. The articulation videos reinforce the pronunciation of the sounds and formation of the mouth. The interactive Vowel Valley, Consonants, and Grapheme Sound Walls can be used for the whole class, small groups, or individually to enhance instruction.
